THE CALGARY GRANT.

We have been given to understand that since we called attention to the sale of the McLeod trail in these columns efforts have been made at several points to make the road more passable. These efforts have been made by landowners and other private individuals passing along the trail and were of use to the fact that they could not proceed with their loads until they had done something. However useful most necessarily be hurried in execution and temporary in effect. We should like to see something more systematic take place.

We believe that there is about \$800 left of the money which was granted almost a year ago by the N. W. Council for the public use of this district. We do not see how it could be better expended on this work of improving the trail south of a bridge at Tongue Creek, a little grading at certain places, a culinary road laid down in the soft places between Calgary and Fish Creek and on the Ridge would take altogether find an excellent use for a good piece of it.

Four worthy members is unwilling to incur the responsibility of deciding alone how this \$800 had best be expended. Let him call a meeting of his constituents, and say so. It will be an easy matter to elect a small committee to act as a Board of Works and assist him in the task. At all events there is no use saving it. The money will meet again in about six weeks when this district will again have a chance to put in her claim for a share of public money. They will be no advantage in having \$800 in our treasury, when we are asserting in the person of our members the necessity of the money for the sake of making us another and larger grant. If it is not spent by this time, members from other districts will think that there is nothing here to spend on. They will not know, like we do, that the real reason is that there are so many worthy ways of spending our grant in this section of the country that we really hardly know where to begin.
